## USO SOUTH CAROLINA RECEIVES MUCH NEEDED SUPPORT FROM THE UPSTATE

*Greenville, SC (July 25, 2011)* - North American Rescue, a premier developer and supplier of life-saving mission critical tactical medical products hosts USO World President Sloan Gibson, and the West Point Society of Upstate SC to support the South Carolina USO.

USO President Sloan Gibson, West Point Society of Upstate SC President Roy Bromfield, and North American Rescue President Sam Wyman have two things in common; they are all graduates of US Military Academy West Point, and they all want to see more support for South Carolina's military.

"Our relationship with the USO and Wounded Warriors is on target for our mission," explained Joanne Walter, Sr. Vice President of North American Rescue. She also stated, "We develop the tools that significantly decrease preventable death for today's warfighter both at home and abroad. As a sponsor of USO SC, we take great pride in knowing that we can positively touch the lives of our military personnel and make a difference off the battlefield as well."

It wasn't just a lunch at the North American Rescue facility headquartered in Greer, SC. Over 50 of Upstate South Carolina's leading business men and women, who also happen to be West Point graduates, gathered to listen to Sloan Gibson and Joanie Thresher talk about current and future needs of the USO, Wounded Warriors, and how they can make a difference. "The USO has relied on partners like North American Rescue for 70 years. Without partners like NAR, the USO South Carolina would not be able to fulfill its mission to provide a 'Home Away from Home' for the military we serve," stated USO South Carolina's Director, Joanie Thresher.

North American Rescue has made it their mission to bring support and awareness to the needs of our Wounded Warriors and active duty military personnel.

North American Rescue (NAR), based in Greer, South Carolina, has proudly enjoyed the honor of serving their country, community, and customers for over a decade. NAR is leading the way in decreasing preventable deaths by providing innovative casualty care solutions to our uniformed soldiers, first responders, health care professionals, and security forces both at home, and abroad in foreign combat zones.
